

HW_07

Due: 5:00pm, 6 October

Create a self-contained R script or Rmarkdown file to do the following:

Import the Canada warbler mark-recapture data `CAWAcaps_2018.csv` and fit the following models in **RMark** and **JAGS**:

- Model M_0
- Model M_t
- Model M_h – Finite mixture
- Model M_h – Logit-normal (**JAGS** only)

Create a table reporting point estimates and 95% CIs for N for each model fit in **RMark** and **JAGS**. Which model has the lowest AICc (**RMark** only)?
